FOR IMMEDIATE RELEASE

ISOTHERM REFRIGERATORS: #1 BY LAND OR SEA

Pompano Beach, Florida – March 6, 2018

Isotherm refrigerators by Indel Webasto have built a reputation for quality, performance, innovative design, and dependability in the marine market for over 50 years. This heritage of premier performance in the roughest marine conditions is now taking on the most rugged off-road conditions for the RV market.

Isotherm is an award-winning brand with two Innovation Awards for Frost-Free DC refrigeration and Smart Energy Control battery-saving technology. With a reputation for low power consumption, Isotherm refrigerators are rapidly growing in popularity in the RV and Van Customization industry due to their safe battery-powered compressor systems, AC/DC functionality, and greater storage capacity vs. traditional 3-way gas refrigeration.

Isotherm products range in size from 16 liters up to 360 liters with models ranging from the economic Elegance models in Silver and Black, to the upscale Clean Touch Stainless Steel, convenient Drawer models, versatile Top-Loading boxes with remote compressors, and portable Travel Box fridge/freezers.

Isotherm brand refrigerators from Indel Webasto have forged a reputation as the world's premiere refrigeration in the marine industry and now is the fastest growing brand in the RV industry. With the best warranty in the industry (5-year limited warranty on all compressors and two years on all other parts), Isotherm is built to last and deliver premium performance in the toughest conditions.

Isotherm leads the way in energy saving technologies with the Isotherm Smart Energy Control (ISEC) and intelligent temperature Control (ITC) which reduce battery consumption by adjusting compressor speed and refrigerator temperatures. With the new Freeline 115, Isotherm combines the ITC and superior insulation to deliver the most energy-efficient fridge in the industry.

Versatility in mounting options for the Elegance line features an innovative anchoring system that allows fridges to be mounted both flush mount and proud mount without a flange. Magnetically sealed freezer compartments lock out frosting issues and molded-in door shelves with cradles and adjustable holders provide sturdy support to keep bottles and jars upright and secure whether you are off-shore or off-road.

The Isotherm USA website gives you full access to the complete line of Isotherm products. Please visit us at: www.indelwebastomarineusa.com for photos, descriptions part numbers, and dimensional drawings in each product's "Technical Details" section.

Indel Webasto Marine is the successful Joint Venture between the leading automotive supplier Webasto, based in Germany, and the Italian refrigeration specialist Indel B.

Please visit the Indel Webasto booth at [RVX: The RV Experience](#) in Salt Lake City, UT on March 12-14, 2019 – Booth 4455
